

An Autonomic Software Integration

Manage Power Use and Save Money and Energy Resources Using ePolicy Orchestrator 4.5 and 4.6

Autonomic Software responds to the need for McAfee ePO users providing a comprehensive Power Management solution

McAfee ePolicy Orchestrator® 4.5 and 4.6 are the only enterprise-class, open platform to centrally manage security for systems, networks, data, and compliance solutions. With end-to-end visibility and powerful automations that slash incident response times, ePolicy Orchestrator dramatically strengthens protection and drives down the cost of managing security. Now ANSA Power Management has been added to ePO as a fully integrated plug-in providing the McAfee users with a comprehensive solution to manage desktop/laptop power usage.

Ansa Power Management 1.2.0:5_ATONMC1200 > Autonomic Configuration > Office Power Policy

The Conservation of Power

The power to conserve and utilize energy gives today's enterprise the means to significantly cut energy costs, reduce global carbon emissions, and increase the networks "Green" footprint. ePO users will have the benefit of applying Power Policies through a familiar interface and know that they are enforced.

ANSA Power Management offers "Green Enterprises" many Advantages:

- Save energy costs - Depending on local electricity costs and net energy savings achieved. Most enterprises can save up to \$40 - \$60 a year per computer and many power providers offer up to \$15 per computer as a onetime rebate.
- IT can conserve energy and still effectively manage and secure desktops
- Power conservation can be integrated and consolidated with other security and system management processes
- Eligible for a growing list of utility company and government power conservation rebate programs

❖ Features:

- Allows IT managers to manage enterprise-wide desktop power conservation through ePO
- Potential to qualify for tax incentives and carbon trading programs
- Policy driven power management through ePO
- Fine-grained controls for hibernation, standby, shut down and wake up
- Policies can target groups, domains, etc.
- Use Wake-On-LAN to wake machines up to perform security maintenance task (patching, DAT updates)
- Centralized, graphical user interface, Dashboard-driven policy setting
- Schedule shutdowns
- Wake up computers via WOL
- Granular reporting
- Supports ePO 4.5 and 4.6

Special Note: Many power suppliers offer special rebate programs to companies who install and use Power Consumption Management solutions. Rebates pays the costs, you pay zero.
