

An Autonomic Software Integration

Automated Patch Management for ePO 4.5 and 4.6

Drastically reduce corporate risk through the timely, proactive installation and management of vendor security patches.

McAfee ePolicy Orchestrator® 4.5 and 4.6 are the only enterprise-class, open platform to centrally manage security for systems, networks, data, and compliance solutions. With end-to-end visibility and powerful automations that slash incident response times, ePolicy Orchestrator dramatically strengthens protection and drives down the cost of managing security. Now ANSA Platinum's Patch Management has been added to ePO's as a fully integrated plug-in providing the McAfee users with a comprehensive solution to manage Patches for desktop/laptop machines.

With ANSA Patch Manager for ePO you have the ability to assess patch management risks is automated, accurate, and comprehensive. That means you always know exactly what patches and holes reside on each server, desktop, and laptop in your enterprise network.

Be Secure

With major software vendors reporting a significant rise in security vulnerabilities each year, IT professionals have a daunting task eradicating all potential threats to the network. Autonomic Software's Patch plug-in for ePO delivers a cost-effective way to quickly, accurately and securely deliver and monitor software patches throughout your enterprise.

A secure, proactive, and preventative process is now available for McAfee ePO users. ANSA Power Manager works quickly, accurately and safely to ensure desktops and servers are patched correctly and completely the first time around.

ANSA Patch Plug-in for ePO Features:

- Enterprise Scalability - Delivery of Patches to large enterprises or meet the requirements of small-to-mid-sized organizations
- Enterprise-wide monitoring and maintenance of patch compliance
- Agent-based patch management ensures complete security coverage for your desktops and also protects remote users on laptops and workstations.
- Patches are applied in minutes
- Always applies patches in proper sequential order
- Compliant with corporate and government regulations and policies
- 100% Accurate
- Granular reports on the status of the organization's security
- Allows the administrator to control the scanning and patch distribution schedule to minimize any disruptions
- efficiency
- Multi-vendor and custom patches
- No disruption to the end user – Patching can be scheduled in hours when the users are not on the system.

Use ANSA Patch Manager to detect, deploy and defend your desktops!

Platforms:

- Microsoft OS
- ePolicy Orchestrator 4.5 and 4.6
